

## Music restrictions – Oyster bar

Please note that we have noise restrictions in place enforced by **Manchester City Council** to ensure that entertainment levels are kept to a level that is respectful to our neighbours.

Senior management will monitor the noise levels during the event and advise the entertainer if these are above those permitted. Failure to comply and adhere to the management requests will result in a noise monitor being activated which will cut out the music should levels remain above 90dB.

Base is to be kept at a minimal/off level – to be dictated on the night by the hotel management

Please note senior managements decision to enforce the noise monitor is final. Any disruption to your event as a result is due to the entertainer not acknowledging our requests and the hotel will not be held responsible. Ultimately senior management have to do their utmost to avoid greater disruption by the EHO.

Speakers must be located on the ground floor of the Oyster bar and not on the mezzanine level . Suppliers to provide cable lengths for speakers indicated depending on area where speakers will be located. The two potential areas where speakers can be set up are as shown

**NO LIVE ARTIST IS PERMITTED TO SET UP IN THE LIBRARY OR ON THE LIBRARY TERRACE**

Both organiser and entertainer are to sign this document in acceptance and understanding of our music terms and conditions.
